Web Development Experience

- Full Stack Volunteer work at Estack. I built the backend API and also led a team of 4 developers, showing them how to work in SCRUM to improve weekly commits by 300%. I also was heavily involved with brainstorming the product and ironing out flaws. I was incharge of reviewing, merging PRs and resolving any conflicts. You can view my contributions on my Github.

  Date : 09/21 - 11/21

- Experience in Building Web apps using ReactJS. I built a movie details website, which you can view here : https://movie-project-rosy.vercel.app/ and you can check out the repo on Github.

- Responsive Web development. You can see my project of a architect's website here : https://architect-website-pied.vercel.app/

- I have experience in working with Figma, I can write and read documentation, work with any CRM and I am well Skilled in Github.

Skills

HTML, CSS, JAVASCRIPT, REACTJS, NODEJS, ExpressJs, Bootstrap , FIGMA,
GIT and mySQL.

About Me

I am skilled in all things Javascript. I can develop Web apps using HTML,CSS,
ReactJs, Nodejs and MySQL. I am well versed in Git Version Control and FIgma.

I love Web Development and solving problems. I was previously a Real Estate
Agent and after a year of Self Studying I am ready to make the jump to a full time
role in development. I am a fun, organized guy that rarely develops anything
without consulting and breaking down tasks on my job board. I am looking
forward to hit the ground running and to grow into a rockstar web developer.
